==========

Raven Employee API ------>>>

Solución de backend desarrollada en Spring Boot para la gestión de empleados, empaquetada y orquestada con Docker para su ejecución inmediata.

==========

Requisitos ------>>>

Docker y Docker Compose instalados.

Puertos 8080 y 3306 disponibles en la máquina local.

==========

Instrucciones de Ejecución ------>>>

Descargar o clonar el repositorio.

Abrir una terminal en la carpeta raíz del proyecto.

Ejecutar el comando: docker-compose up --build -d

Validar que los contenedores "db-employee" y "ms-employee-app" estén corriendo.

==========

Tecnologías Utilizadas ------>>>

Java 17 / Spring Boot 3.5.

MySQL 8.0 como motor de base de datos.

SpringDoc OpenAPI 2.8.6 para documentación.

Docker y Docker Compose para contenedores.

==========

Consideraciones de Lógica ------>>>

Borrado Lógico: Los empleados no se eliminan físicamente de la base de datos; se deshabilitan mediante la columna 'is_active'.

Consistencia: El sistema bloquea automáticamente consultas, actualizaciones y búsquedas sobre registros que han sido borrados lógicamente (is_active = 0).

==========

Documentación y Pruebas ------>>>

Para interactuar con la API y revisar los endpoints, acceder a:
http://localhost:8080/swagger-ui/index.html

Las evidencias adicionales de ejecución (capturas de pantalla) se encuentran en el archivo PDF adjunto en la entrega.

Evidencias Ejecución→

Set de todas las pruebas en el collection, se ilustran las más importantes

- Raven Employee API final
  - A. Crear Empleado (POST)
    - POST A1. Caso OK
    - POST A2. Caso Error (Bad Request)
  - B. Crear Lote (POST)
    - POST B1. Caso OK
    - POST B2. Caso Error (Validation)
  - C. Obtener Todos (GET)
    - GET C1. Caso OK
  - D. Obtener por ID (GET)
    - GET D1. Caso OK
    - GET D2. Caso Error (Not Found)
  - E. Buscar por Nombre (GET)
    - GET E1. Caso OK
  - F. Actualizar Total (PUT)
    - PUT F1. Caso OK
    - PUT F2. Caso Error (Bad Request)
  - G. Actualizar Parcial (PATCH)
    - PATCH G1. Caso OK
    - PATCH G2. Caso Error (Not Found)
  - H. Borrado Lógico (DELETE)
    - DEL H1. Caso OK
    - DEL H2. Caso Error (Not Found)

Creación de un empleado

POST {{baseUrl}} /employees
